

One of the main reasons I purchased XM was to get weather reports. I listen to XM weather on trips when I can't get local stations or the stations do not provide enough weather information. When I am in my local area or in an area with good weather reports I listen to the local broadcast. I live in Oklahoma which has very severe weather and there are many rural areas without radio reception or the local station doesn't have the resources or format to report the weather. Please do NOT limit the ability of XM to provide me with this valuable and possibly life saving service.
